

Infinite Limits

In the last section, we learned about how to calculate limits with the graph and algebraically. Now, we are going to learn about infinite limits.

$$\lim_{x \rightarrow -\infty} f(x)$$

$$\lim_{x \rightarrow \infty} f(x)$$

Ex 1: Evaluate the limit.

$$\lim_{x \rightarrow \infty} \frac{2}{x^2}$$

Ex 2: Evaluate the limit.

$$\lim_{x \rightarrow \infty} \frac{x - 6}{4x + 5}$$

Ex 3: Evaluate the limit.

$$\lim_{x \rightarrow -\infty} \frac{10x + 100}{x^2 - 30}$$

Ex 4: Evaluate the limit.

$$\lim_{x \rightarrow \infty} \frac{4x^3 + 2x^2}{5x + x^2}$$
